Nuriddinov Shokrukh

Full-Stack Web Developer (React / Next.js / Node.js)

Full-Stack Web Developer specializing in modern web applications using React, Next.js, Node.js, and TypeScript. Experienced in building scalable platforms, real-time systems, and user-centered applications from concept to deployment. Strong background in frontend architecture, backend API development, authentication systems, and modern development workflows.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, React Query (TanStack), Redux, Zustand, HTML, CSS, Tailwind CSS, Sass, shadcn/ui, Material UI, Recharts

Backend: Node.js, Express.js, REST APIs, GraphQL APIs, JWT Authentication, WebSockets, Socket.io

Database: PostgreSQL, MongoDB, Prisma, Mongoose, TypeORM

AI Tools: ChatGPT, Claude.ai, Cursor, Codex, Antigravity

DevOps & Tools: Git, GitHub, Vercel, Inngest, Postman, Figma, VS Code

Experience

○ Sep 2023- March 2026

Sammi agency

Full-Stack Developer

- Contributed to a large-scale online learning platform serving 70,000+ active users.
- Developed LMS features including video courses, progress tracking, student dashboards, instructor tools, and admin dashboards.
- Built reusable and responsive frontend components using React, Next.js, and Tailwind CSS.
- Developed and integrated backend functionality using Node.js, Express.js, MongoDB, and REST APIs.
- Improved frontend and API performance to deliver a faster, more responsive user experience

Selected projects

Full stack developer

- E-Commerce Microservices Platform:** Built a scalable full-stack e-commerce platform using Next.js and Node.js. Implemented authentication, product management, and order workflows. Used PostgreSQL and Prisma ORM for database management. Applied responsive design using Tailwind CSS. Organized services with Turborepo and monorepo architecture.
- AI-Powered Stock Tracker Platform:** Built a real-time financial analytics platform with live stock prices, candlestick charts, intelligent search, watchlist, and AI-powered alerts. Implemented automated workflows using Inngest for alert scheduling, daily summaries, and earnings notifications. Created an admin dashboard for stock management, publishing news, and monitoring user activity.
